Vertical Blinds

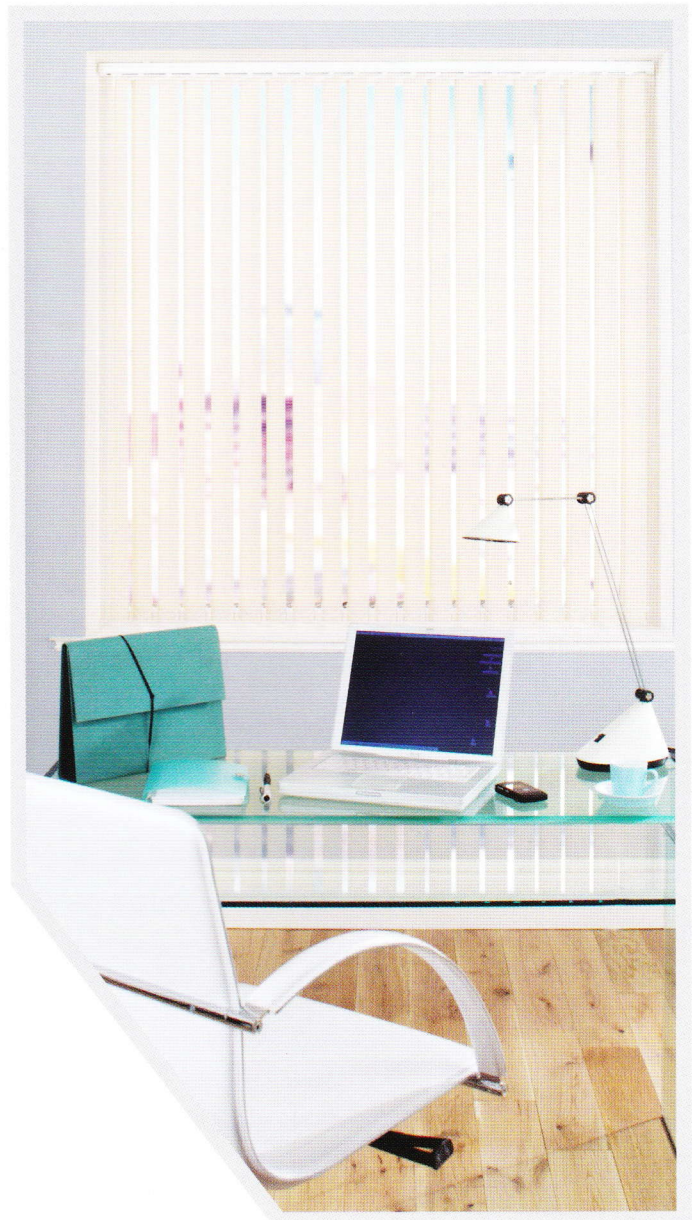

ALL THE RIGHT MOVES

Always elegant, vertical drapes by Uniline offer cutting-edge design, smooth operation, and insulation from the elements. Their sleek form suits modern decors that embrace clean, uncluttered lines, while their practicality makes them ideal for sliding doors or larger windows.

Tilt the blades of fabric, using a chain mechanism, or mono wand unit to control the level of light in your home or office, as well as the degree of privacy. Want to see the view? Pull the cord and watch the blades neatly stack away to the left, right or even the centre, to reveal the world outside. Close them to block out heat, cold or glare, or have them partially open. With versatile verticals, the choice is yours. Uniline vertical drapes come in two top-flight tracking systems: the Slim Series, and the ultra-sturdy Unitrak.

Both systems can be made in a wide range of fabric colours from the Uniline collections, with tracks in White, Grey, Beige, Birch White or Ebony, to match any window frame. Both systems feature stainless steel spacer links, which resist rust – even salt-sprayed coastal climates – and give drapes a consistent overlap to block out the sun. Weights in the bottom of each drape hold them straight, and are also rust-resistant to avoid stains or discolouration on drapes as time goes on.

SLEEK AND STREAMLINED - The Slim Series

- A streamlined system that doesn't skimp on strength, the Slim Series is perfect if you like a minimal look for window furnishings. The Slim Series comes in a maximum width of 5.8m and maximum drop of 4m, catering for even the largest door or window openings.
- Available in five neutral shades, the track comes with a space for a fabric insert, to match or contrast with the blades. A great way to customise your look.

THE STATEMENT DRAPE - The Unitrak System

- Based on a sturdy aluminium mechanism, Unitrak is the Rocky Balboa of vertical drapes. Carrier wheels ensure a super-smooth operation, and a bottom chain and clip hold the blades together. Super hardwearing, Unitrak is perfect for commercial office settings or hi-traffic areas in the home.
- Even the largest windows and doors are catered for, with a maximum width of 5.8m and a maximum drop of 4m.
- Unitrak comes with an optional pelmet in one of two neutral shades. Keep the pelmet plain or spice it up with a fabric insert to either match or contrast with your chosen blade fabric.

ELEGANT & VERSATILE

- An extensive fabric range offers total creativity when choosing the look and feel of your Vertical blind
- Design offers the finest adjustment and ease of rotation to allow you to control light levels and privacy
